

# BALANCED ECO INVEST

Investment plans Switzerland, Plan No. 277  
 Monthly Report, 01.03.2024

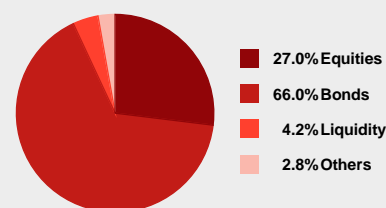

## Investment Goal

The plan has its focus on sustainable investment. The proportion of fixed-interest securities is greater than that of equities. A spread over a variety of countries and currencies helps to avoid major exchange-rate fluctuations. Investors enjoy a high chance of good returns while taking on only moderate risk.

The performance is calculated on the basis on a unit-linked insurance financed through a single premium payment. Regular premiums result in other performance figures because of the different timing of the investment. Historic performance data are furthermore no guarantee of future returns. The future performance of investments cannot be deduced from previous market development, i.e. the value of an investment may fall as well as rise. The prices used to calculate performance correspond to the inventory values published by the fund management companies at the beginning of the month, plus or less any commissions.
