

GROWTH FOCUS EUROPE

Investment plans Switzerland, Plan No. 253
 Monthly Report, 01.03.2024

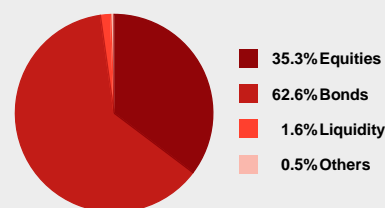

Investment Goal

The portfolio's primary regional focus for investment is Europe. It includes not only established bond funds from Credit Suisse and DWS but also, in the shape of the "Fidelity European Dynamic Growth Fund", a stock picker underpinned by fundamental analysis. The fund managers at the "Fidelity European Dynamic Growth Fund" deliberately seek out enterprises that have their head office or a main part of their activity in Europe and whose long-term growth potential is mispriced by the market. The fund generally holds a concentrated portfolio. In selecting equities, the Fidelity Fund has a bias to medium size company shares, and is not subject to any restrictions in respect of weighting by country or sector.

To establish your specific investment requirements and preferred levels of risk, we advise you to consult your advisor.

The performance is calculated on the basis on a unit-linked insurance financed through a single premium payment. Regular premiums result in other performance figures because of the different timing of the investment. Historic performance data are furthermore no guarantee of future returns. The future performance of investments cannot be deduced from previous market development, i.e. the value of an investment may fall as well as rise. The prices used to calculate performance correspond to the inventory values published by the fund management companies at the beginning of the month, plus or less any commissions.
