

MULTI INDEX 40

Investment plans Switzerland, Plan No. 50
 Monthly Report, 01.03.2024

Investment Goal

The "Multi Index 40" investment plan consists of the "FORTUNA Multi INDEX 40" umbrella fund. This umbrella fund invests worldwide in index funds. All index funds replicate a large liquid index as exactly as possible by investing in all securities contained in that index. The benchmark of the umbrella fund is based on the weighting of the single indices. Once a month the umbrella fund is rebalanced to realign the percentage weighting of the index funds. With a target equity component of 40%, the investment approach is balanced and favours CHF. The objective of this strategy is to grow assets significantly over the long term.

To establish your specific investment requirements and preferred levels of risk, we advise you to consult your advisor.

The performance is calculated on the basis on a unit-linked insurance financed through a single premium payment. Regular premiums result in other performance figures because of the different timing of the investment. Historic performance data are furthermore no guarantee of future returns. The future performance of investments cannot be deduced from previous market development, i.e. the value of an investment may fall as well as rise. The prices used to calculate performance correspond to the inventory values published by the fund management companies at the beginning of the month, plus or less any commissions.

Generali Insurances of Persons Ltd. is unable to guarantee (explicitly nor implicitly) that the published information and opinions are accurate, complete and up to date. Only the sales prospectuses for the individual funds and the General Policy Conditions are binding.
