

BEST SELECTION 30

Investment plans Switzerland, Plan No. 211
 Monthly Report, 01.03.2024

Investment Goal

When selecting the funds, all of the world's major markets are taken into consideration, so as to ensure broad diversification across various countries, currencies and levels of economic development. The most constant funds form the core and guarantee the stability of the investment. Within the further asset classes, a best in class approach ensures that the investment plan only ever contains the best-performing funds. With a target equity component of 30%, the investment approach is balanced and favours CHF. The objective of this strategy is to grow assets over the long term while keeping price fluctuations to a relatively low level.

To establish your specific investment requirements and preferred levels of risk, we advise you to consult your advisor.

The performance is calculated on the basis on a unit-linked insurance financed through a single premium payment. Regular premiums result in other performance figures because of the different timing of the investment. Historic performance data are furthermore no guarantee of future returns. The future performance of investments cannot be deduced from previous market development, i.e. the value of an investment may fall as well as rise. The prices used to calculate performance correspond to the inventory values published by the fund management companies at the beginning of the month, plus or less any commissions.
