

GROWTH EUROPE VALUE

Investment plans Switzerland, Plan No. 44
 Monthly Report, 01.03.2024

Investment Goal

Almost $\frac{3}{4}$ of the assets in the portfolio are placed in European countries and currencies. Within the equity component the substance-oriented "JPMF - Europe Strategic Value Fund" is especially significant. In the Pan-European area, undervalued enterprises are systematically sought with a bottom-up investment process, which leads to an additional increase of performance opportunities. Because of the relatively high equity part, this investment plan is particularly suited for longer investment horizons.

To establish your specific investment requirements and preferred levels of risk, we advise you to consult your advisor.

The performance is calculated on the basis on a unit-linked insurance financed through a single premium payment. Regular premiums result in other performance figures because of the different timing of the investment. Historic performance data are furthermore no guarantee of future returns. The future performance of investments cannot be deduced from previous market development, i.e. the value of an investment may fall as well as rise. The prices used to calculate performance correspond to the inventory values published by the fund management companies at the beginning of the month, plus or less any commissions.
